LED ROLLING DISPLAY

LED Rolling Display is a new generation of innovative LED Display products, in addition to the traditional display all the features and technical features, its excellent structure design makes it roll up like paper, and it has the appearance of ultra-thin and ultra-light weight, is the ideal alternative to traditional display, suitable for all traditional display applications.

Features

- 1 Fine pixel pitch: P0.9, P1.25, P1.5625, P1.953, P2.604, P3.91**
Small pitch pixel ensures the HD display, higher contrast and more realistic colors
- 2 GOB Technology (IK10 & IP65)**
Surface safty with IK10 anti-collision grade and IP65 Waterproof grade., also with Non-slip mat and anti-reflection. And high visual performance (with high contrast LED for uniform visual performance in black) are considered.
- 3 Built-in Receiving card**
- 4 Light weight and super thin**
15KGS/sqm weight and 10mm thickness make easy to install and carry, which can simplify the design of supporting structure to design better artistic effect.
- 5 6063 Aluminum module case**
Aluminum case adopts stretching process, which makes sure the accurate size and have the best heat dissipation from the LED.
- 6 Low voltage input**
Low voltage 24V/DC input for every unit screen ensures safer use.
- 7 Free installation and easy maintenance**
Its simple structure allows for easy installation and quick maintenance.

Application I FAST DISPLAY

LED Fast Display is one of the popular applications of LED Rolling Display series. With the unique patent structure of LED Rolling Display and the power of hydraulic lifting system, LED Fast Display can be up and down automatically with free installation and shakedown. And all in one flight case makes it easy to move to everywhere you want to go. It is mainly used somewhere need to be temporary construction and display, like wedding scene, conference site and party, etc.

installation free

one-key operation

events like wedding

classroom

conference

mobile theater

Model I:

(H) 3,000mm X (W) 1,500mm

Weight: 350KGS

Model II:

(H) 3,000mm X (W) 2,000mm

Weight: 430KGS

* All in one flight case

* The size can be customized according to your demands.

Features

Pixel Pitch option: P0.9, P1.2, P1.5, P1.9, P2.6, P3.9

Convenient operation using remote controller or one-key operation.

All in one flight case body.

DC24V input for screen part, safety use.

Free installation & shakedown.

3-year warranty and life-long maintenance

Model	FD-15	FD-20	CUSTOM
Screen area:	4.5m ²	6m ²	up tp 20m ²

Application II LED ROLLING FLOOR

Thanks for the patented technology of LED Rolling Display, Rolling Floor Display is designed for replacing the conversional LED Floor Screen, which can be installed as simple as laying a carpet. Without PC mask, LED Rolling Floor Display can get the more excellent appearance and display effect in high contrast, and comparing with the conversional LED Floor screen, it is without the splicing gap problem, better flatness and integrity.

Conversional LED Floor Display

- * Mask shading & cross light
- * Obvious splicing gap & screw points
- * Poor appearance & display effect
- * Low contrast

LED Rolling Floor

- * Without PC mask
- * Without gap, clearly display
- * Excellent appearance & display effect
- * High contrast

PK

Advantages

Fine Pitch P0.9, P1.2, P1.5, P1.9, P2.6, P3.9 all available

No splicing gap & screw points

No need supporting structure, directly lay on the ground

Smaller storage space, 10sqm just need 0.65CBM flight case

Ultra light, 15KGS/sqm

Features

Pixel Pitch option: P0.9, P1.2, P1.5, P1.9, P2.6, P3.9

High precision seamless splicing

Top protection GOB HD display

Ultra wide viewing angle

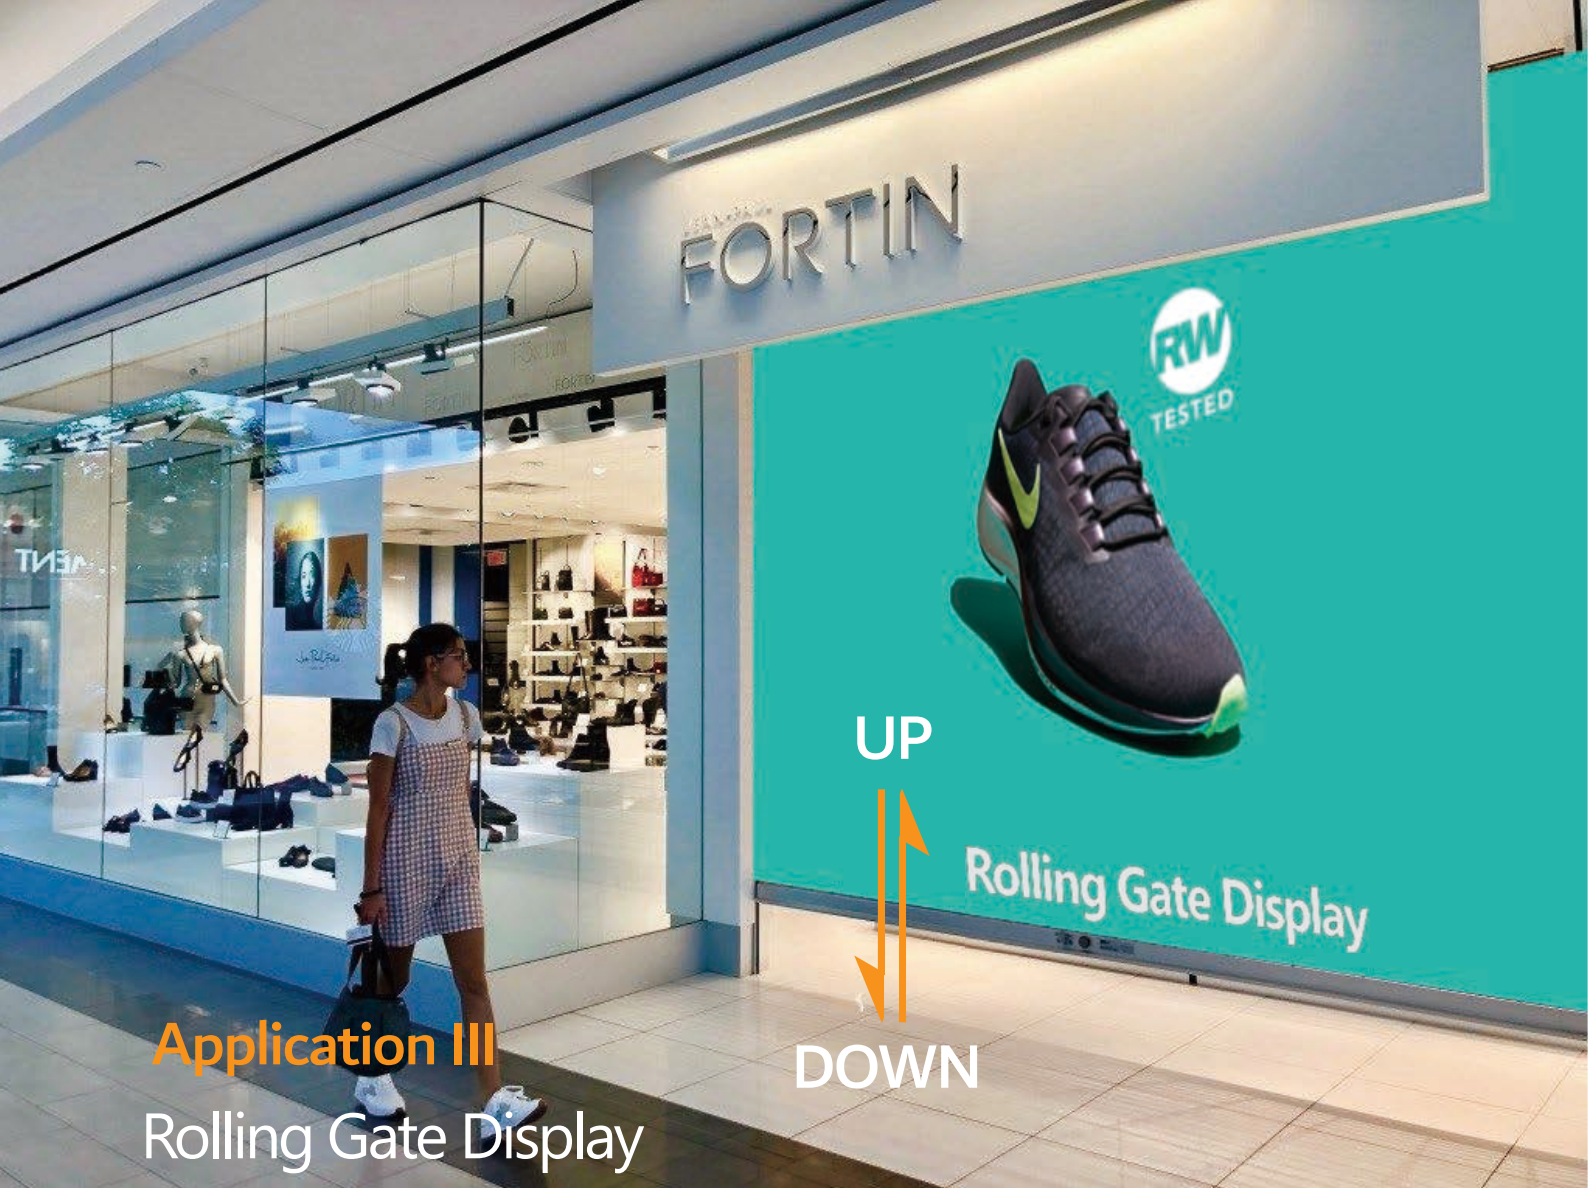

Low voltage 24V/DC input ensure safer use

Exquisite structure ensures to bear more than 2.5 tons

Application III

Rolling Gate Display

Rolling Gate Display is a wonderful and amazing application special for the place where the rolling gate is installed. It can extend the brand value in off-work time and rich the night view of the city, meanwhile it also can be used as the rolling door. IK10 anti-collision and IP65 waterproof class make sure it can resist the impact outside. With its principle, Rolling Gate Display also can be used to classroom, shopping mall, meeting room and showroom, etc. where frequently need to be displayed and hidden.

Features

- Pixel Pitch option: P1.2, P1.5, P1.9, P2.6, P3.9
- One-key lifting system
- GOB technology, IK10 and IP63 (front) proof
- DC24V input for screen part, safety use
- Universal size can be customized

Model	RG-15	CUSTOM
Screen area:	5m ²	up tp 25m ²
Screen size	H: 2m X W: 2.5m	up to 5m X5m
Brightssness	600~800nits	600~800 nits
Servo Motor Wattage	2400W	Max. 5000W
Rated torsion	140N.W	300N.W
Weight:	120KGS	up to 500KGS
Remote controller:	yes	yes
IP rating:	IP63 (front)/IP21 (rear)	IP63 (front)/IP21 (rear)

Application IV

ROLLING POSTER DISPLAY

Features

Ultra-light & Ultra-slim

Rolling Poster Display is designed in frameless. When replaced side by side, it can be seamless splicing, make it nearly invisible. The high-end aluminum frame and slim design make the appearance of the Rolling Post Display simple and impactful. The base is equipped with wheels allowing it to be moved easily, and making relocation simple and easy.

Support WIFI, HDMI & USB & Network control

Rolling Poster Display has a built-in media player that is supported by PC & Android Apps. In addition, Rolling Poster Display is equipped with Wi-Fi, providing management via your Mobile device including content publishing. You can also simply just plug a USB Thumb drive to play content directly to the Poster Display.

Small Storage Space & Easy-carrying

Just one bag (around 80cm length and 15KGS weight) can hold when the rolling poster display need to be moved or carried.

Multi-Screen Splicing

Multi-screen cascade brings a unique visual experience. Rolling Poster Display single-screen mode and split-screen mode. You can splice different numbers of Poster Display together, creating a large video wall display of up to 6 units sync'd together at a ratio of 16:9.

With the addition of an external video wall processor, 10~16 units can be sync'd together for up to a 4K resolution.

Fixed and Installing

Floor Stand, wall-mounted, hanging, etc.

Specification

Model	PD-S01 (single side)	PD-D02 (double side)
Screen Size	(H)1.5mX(W)0.75m	(H)1.5mX(W)0.75m

** P0.9, P1.2, P1.9, P2.6, P3.9 are available.

Application V ROLLING TV

Benefited from the small carrying size and simple installation, you can get your private theater and stage, only with two camera brackets. Put a ROLLING TV with 2K screen in the trunk of the car and take it wherever you want to go. Which will make your party or family camping more funny and colorful.

Novastar TU20 video processor

Hanging Sliding Rail

Hanging bar/Updown right/left connection bar

Right/left Splicing Bar

Fixed Bar

Adjustable Hook

Hanging Ring

Features

- * Pixel Pitch: P1.25
- * Ultra-slim (thickness: 10mm) & ultra-light weight (13KGS/sqm) design
- * Front & Rear service
- * Hanging/wall mounted optional
- * Small storage space, one flight case in 0.6CBM
- * Easy and rapid installation
- * Support Wi-Fi, HDMI & USB & Network control by PC, Android and ISO system.

Model	RT-1.25
Screen Size	(W)1.75mX(H)1m
Screen Resolution	1,400 X 800 (1080p)
Screen Brightness	600nits
Refreshing Rate	3,840Hz
Screen Unit Size	1mX0.75m (1 roll) 1mX1m (1 roll)
Weight	35KGS
Controller System	Novastar TU20
IP rating	IP63 (front)/IP21 (rear)

Package Include:

- P1.25 LED Rolling Display Unit (2 rolls)
- Novastar Meeting Media Player (1 pc)
- Camera Bracket (2 sets)
- Adjustable Hook (2 pcs)
- Hanging Bar with 2 hanging rings (2 sets)
- Supporting Bar with Sliding rail and Pulley
- Cat6 cable (25ft)
- Power Supply Unit: (1 set)

Ultra-slim & simple installation design

Application VI PICTURE VIDEO WALL

Picture Video Wall is a perfect solution to replace the traditional Wall Video. No need to destroy the wall, no need the extra structure and no need the complex wiring connection, just a thickness 20mm metal frame can build the whole LED Rolling Display to combine a nice video wall. And the input of screen part is DC 24V, which is safety use. It is the best choice for indoor wall video application, like meeting room, museum, shopping mall, and airport, etc.

Features

Pixel Pitch option: P0.9, P1.2, P1.5, P1.9, P2.6, P3.9

Super slim 15~20mm installation thickness

Super light 15KGS per sqm, easy to carry

Simple wiring connection, plug and play

Front & rear service

GOB technology, anti-collision and waterproof IP63 (front)

Centralized power management, maintenance no need to be removed the module

Installation

1. Fixed the frame on the wall;
2. Spread the rolling display unit;
3. Put the rolling display on the frame and it will be adsorbed to the frame by magnetic table.

Application VI LED SHELF DISPLAY

LED Shelf Display is a special application of LED Rolling Display module unit, which is slim LED advertising screen designed for impact and creative visual marketing. You can upload content with USB, Wifi, 4G, network. You can connect multiple Smart shelf LED Tags to create a large screen or divide the screens to play multiple video product promotions. Light enough to be moved and big enough to be seen at a distance makes our Smart shelf LED Panels a real asset to business.

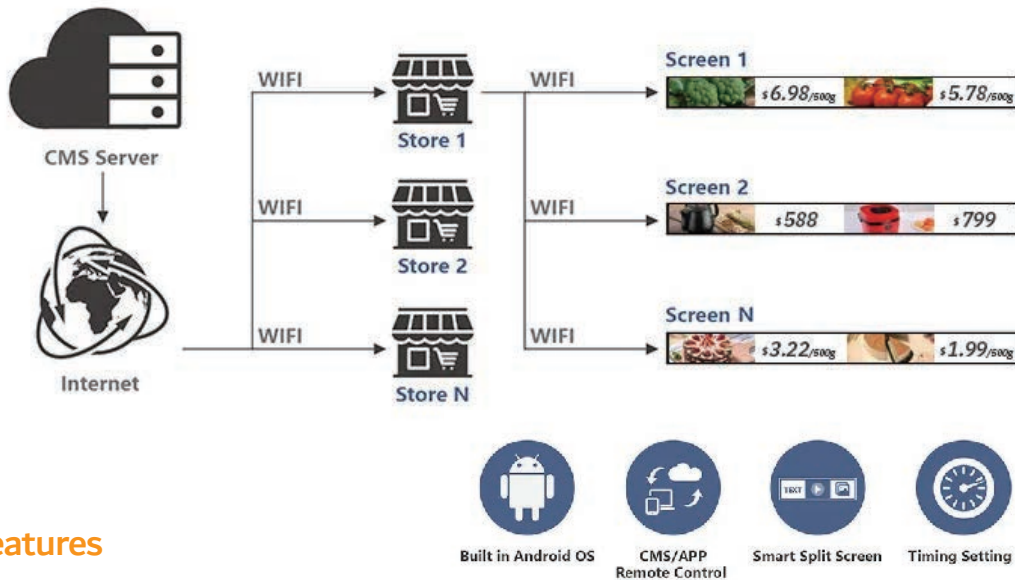

who wish to have a high visual impact to attract attentions.

PERFECT DIGITAL SHELF SOLUTION

for supermarket shelves of different length

System Features

Features

Super slim and light.

13mm thickness, easy to install and move.

Multiple installation modes, such as stand, wall-mounted and etc.

Plug-in display, simple operation.

Multiple linkage modes, such as single display application, cascaded application and creative application, etc.

USB/WiFi/HDMI/cable connection by PC and Android and ISO management & publish.

Calibration data saved on modules, recover factory setting in 5 seconds.

LED Perfect Curve LED FLEXIBLE DISPLAY

Indoor Flexible-IF series

High flatness High Contrast Gorgeous Appearance

With Patented technology, Perfect Curve series flexible module can help the designer to make any shape and angle.

Available shape: S shape, concave, convex, creative design, cylinder

EMC class B certificates

Exquisite Design

PCB

1. 0.6mm FR4 make the module easier to bend and won't deform.
2. Golden soldering plated avoid the rosin joint, ensure module stability
3. 4-layers (6-layers under P1.9) circuit board Strict compliance with safety standards

Input port

Bending Line

All the components avoid the bending line, no damage when bending.

Limit position buckle

Male and female coupling clip make module avoid to be over-bended.

Installation Magnet

Left-right side of module is designed with position pillars and holes to be installed quickly and conveniently. Modules are installed solidly with strong magnets.

Each module can match the color directly, better color consistency. Build-in receiving card

Structure

8 modules completes a circle whose minimum diameter is 636.6mm

S shape, concave, convex, creative design, cylinder

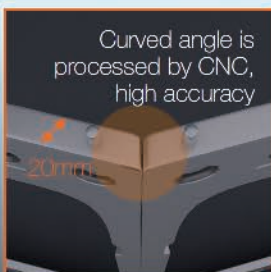

Perfect Curve Design-CNC Aluminum Cabinet

CNC magnet install hole
— with curve degree
— 0.2mm tolerance

Module location hole

Curved angle is processed by CNC, high accuracy

20mm

Perfect Flatness

IF series: Seamless conjunction.

Others: The edge of the module is tilted after screen some times working.

Front Installation & Front Maintenance

Magnetic module front service equipped with magnet tool

High Gray Scale

8 bit

14~16 bit

16-bit color processing provides a higher greyscale level, which seamlessly displays different depths and densities of colors without distortion, thereby giving a more realistic and sophisticated content.

High Refresh Rate

The high refresh rate of 3,840Hz assures the smooth playback of content. The flicker-free image prevents the black bars that occur from video shooting, as well as eye strain and blurred vision in viewers.

LED Perfect Curve

LED FLEXIBLE DISPLAY

Outdoor Flexible-OF series

High flatness High Contrast Gorgeous Appearance

IP68 waterproof--The module can work under water.

Metal Mask--Anti-UV, anti-aging & no deformation, and improve the contrast of display.

P2.54 Pixel Pitch is available

Available shapes: S shape, concave, convex, creative design, cylinder

IP68, Metal Mask, P2.54

Exquisite Design

Structure

8 modules completes a circle whose minimum diameter is 636.6mm

S shape, concave, convex, creative design, cylinder

Waterproof Iron Cabinet

Rear view

Perfect Flatness

OF series: Seamless conjunction.

Others: The edge of the module is tilted after screen some times working.

Front Installation & Front Maintenance

Magnetic module front service equipped with magnet tool

High Gray Scale

8 bit

Picture Quality

14~16 bit

16-bit color processing provides a higher grayscale level, which seamlessly displays different depths and densities of colors without distortion, thereby giving a more realistic and sophisticated content.

High Refresh Rate

The high refresh rate of 3,840Hz assures the smooth playback of content. The flicker-free image prevents the black bars that occur from video shooting, as well as eye strain and blurred vision in viewers.

LED Fine Pitch Module

LED FLAT DISPLAY

Indoor Flat-IT series

- 2.0mm thickness PCB design
- Module Size: 250X250mm
- GOB technology is optional.
- EMC-class B certificates
- Magnetic Fixation
- Frontal black plastic mask

Module A: P0.9, P1.25, P1.56

Module B: P1.9, P2.6, P3.9

Flex. + Fixed module

Can joining with Indoor Flexible Module IF series together to realize a variety of design

Cabinet

Cabinet weight **4kgs** only, easy to move and install.

Cabinet thickness **40mm** only, slim design.

Die casting cabinet, higher splicing preciseness, better flatness.

Full front access, all the parts can be serviced from front side, no installation space required behind the cabinet.

Installation: **hanging, stacking, wall mounting.**

Multiple sizes

Cabinet details

Right angle splicing

Outdoor LED Module

LED FLAT DISPLAY

Outdoor Flat-OT series

- Pixel Pitch: P3.91
- Module Size: 250X250mm
- IP68 Waterproof Level
- Metal Mask-Anti UV
- Ventilating valve design
- Full rear maintenance

Fixing and Installing

Fixation with screws-The modules are attached to the cabinet structure by screws. This is the most standard and usual way on LED Display.

Magnetic fixation- For quick substitutions where maintenance has to be done in a few seconds. For this function, the screws are replaced by magnets.

Metal Mask design

Anti-UV, anti-aging & no deformation, and improve the contrast of display.

Ventilating valve design

Balance the pressure difference between the interior of the module and the surrounding environment. And make sure the water cannot enter the module.

IP68 waterproof

The module can work under water.

Ventilating valve

Metal Mask

Cabinet

Waterproof Iron Cabinet

Customized Iron Cabinet

The cabinet can be customized according to the project details.

Control Box

IP68 waterproof control box, power supply, hub+receiving card inside.

Aircraft Connector

All main wiring connection use aircraft connector to ensure the IP 68 waterproof.

Rear Maintenance

Full rear maintenance and service.
